

Geiger Energy issues Letter to Shareholders

January 19, 2026 - Toronto, ON Geiger Energy Corp. ("**Geiger**") or the ("**Company**") (TSXV: BEEP; OTCQB: BSENF) today issued a letter to shareholders from its President and Chief Executive Officer, Dr. Rebecca Hunter.

Dear Shareholders,

As we gear up for our 2026 exploration programs, I am excited to share our vision for Geiger Energy and the opportunities ahead.

Our focus is clear: disciplined, high-impact exploration on projects with the potential to deliver significant discoveries. We enter this year positioned to capitalize on our two flagship assets, the **Hook** and **Aberdeen** projects, both of which host known mineralization and substantial upside potential. Our strategy is simple, select the best targets, execute technically, and allocate capital to maximize results.

2026 Exploration Outlook

Hook Project, Athabasca Basin

We are preparing a 2,000 m drill program starting in middle February, largely targeting high-priority zones outside the main ACKIO discovery. The initial focus will be the TT area, where 2024 drilling identified strong clay alteration, anomalous geochemistry, and elevated uranium. Follow-up drilling will test down-dip extensions to explore potential deeper mineralized systems. Additional targets, including the TAB area, will be advanced, leveraging numerous surficial geochemical anomalies across the property. Every metre drilled is aimed at uncovering new zones with real growth potential.

Aberdeen Project, Thelon Basin, Nunavut

For this summer, we are planning a 10,000 m drill program, building on the first confirmed intersection of unconformity-style uranium at the Loki target. Preparations are underway for logistics, including fixed-wing cargo flights and overland hauling of equipment. Drilling will focus on follow-up at Loki and major gravity anomalies along the Thelon Fault, targeting additional sandstone-basement unconformity settings. Early 2025 results at Bjorn, Lobster, and Tarzan continue to indicate multiple high-potential systems, and geochemical data will be released as received.

Capital Discipline and Execution

Geiger Energy enters 2026 with sufficient capital to execute the near-term drilling at Hook and logistical preparations for the Aberdeen Project efficiently. We remain focused on maximizing technical outcomes per dollar invested and evaluating funding opportunities carefully to minimize shareholder dilution. Our approach is disciplined, results-driven, and always aligned with long-term value creation.

Defining Success in 2026

Success for Geiger Energy will be measured by discovery potential realized through disciplined exploration in expanding mineralized zones at Hook, refining unconformity targets at Aberdeen, and generating results that materially increase the understanding of these world-class systems. While exploration inherently carries risk, our programs target the highest-potential opportunities to create meaningful shareholder value.

We are energized by the path ahead. With a clear strategy, strong technical execution, and a focus on high-impact projects, 2026 presents an exciting opportunity to unlock the next major uranium discovery in the Thelon Basin.

Thank you for your continued support and confidence in Geiger Energy's growth journey – and I encourage each of our shareholders to contact me directly to discuss our path forward.

Sincerely,

Rebecca Hunter
President & Chief Executive Officer
Geiger Energy Corp.

About Geiger

Geiger is a uranium exploration company executing on a dual basin strategy focused on discovering high-grade uranium deposits on its two flagship assets within the Athabasca and Thelon basins. In the Athabasca Basin, Saskatchewan, Geiger is exploring its Hook Project, which hosts the ACKIO near-surface uranium prospect. In the Thelon Basin, Nunavut, Geiger is advancing its Aberdeen Project, which hosts the high-grade Tatiggaq and Qavvik uranium discoveries. The Hook and Aberdeen projects have expandability potential within the discovery footprints, as well as host numerous additional targets outboard of the prospect areas, highlighting significant potential for expansion and new discoveries.

Qualified Person Statement

The technical information contained in this news release has been reviewed and approved by Rebecca Hunter, P.Geo, President & CEO of Geiger Energy Corp., a Qualified Person, as defined in "National Instrument 43-101, Standards of Disclosure for Mineral Projects."

Cautionary Statement

Certain information in this news release is considered forward-looking within the meaning of certain securities laws and is subject to important risks, uncertainties and assumptions. This forward-looking information includes, among other things, information with respect to Geiger's beliefs, plans, expectations, anticipations, estimates and intentions. The words "may", "could", "should", "would", "suspect", "outlook", "believe", "anticipate", "estimate", "expect", "intend", "plan", "target" and similar words and expressions are used to identify forward-looking information. The forward-looking information in this news release describes Geiger's expectations as of the date of this news release.

The results or events anticipated or predicted in such forward-looking information may differ materially from actual results or events. Material factors which could cause actual results or events to differ materially from such forward-looking information include, among others, risks arising from general economic conditions; adverse industry events; inability to realize anticipated synergies; future legislative and regulatory developments; inability to access sufficient capital from internal and external sources, and/or inability to access sufficient capital on favourable terms; income tax and regulatory matters; the ability of Geiger to implement its business strategies; competition; currency and interest rate fluctuations and other risks. Readers are cautioned that the foregoing list is not exhaustive.

Geiger cautions that the foregoing list of material factors is not exhaustive. When relying on forward-looking information to make decisions, investors and others should carefully consider the foregoing factors and other uncertainties and potential events. Geiger has assumed a certain progression, which may not be realized. It has also assumed that the material factors referred to in the previous paragraph will not cause such forward-looking information to differ materially from actual results or events. However, the list of these factors is not exhaustive and is subject to change and there can be no assurance that such assumptions will reflect the actual outcome of such items or factors.

THE FORWARD-LOOKING INFORMATION CONTAINED IN THIS NEWS RELEASE REPRESENTS THE EXPECTATIONS OF GEIGER AS OF THE DATE OF THIS NEWS RELEASE AND, ACCORDINGLY, IS SUBJECT TO CHANGE AFTER SUCH DATE. READERS SHOULD NOT PLACE UNDUE IMPORTANCE ON FORWARD-LOOKING INFORMATION AND SHOULD NOT RELY UPON THIS INFORMATION AS OF ANY OTHER DATE. WHILE GEIGER MAY ELECT TO, IT DOES NOT UNDERTAKE TO UPDATE THIS INFORMATION AT ANY PARTICULAR TIME.

Neither the TSXV nor its Regulation Services Provider (as that term is defined in the policies of the TSXV) accepts responsibility for the adequacy or accuracy of this release.
